About us and our activities

2023-24

Welcome

- Chembond Chemicals Limited was founded in 1974
- Consistent performer; dividend paying since inception
- Pan-India manufacturing, sales and service footprint
- Head Office in Navi Mumbai, MH
- DSIR certified R&D facilities at Navi Mumbai, MH and Dudhwada, GJ
- Family driven, professionally managed, agile organization
- New business lines are evaluated and incubated continuously

Core Business Units

- Businesses aligned by solutions offered and segments catered
- Each business has a team of specialists working in the field with customers

Water

- Water is extensively used by industries
- Different areas / applications of water in industry:
 - Raw Water, Boiler Water, Cooling Water, Wastewater, RO membrane
- Raw water quality and availability varies across the country / world
- Treatment of raw water for any further use thus becomes critical
- Inadequate / improper treatment becomes detrimental to plant performance and longevity

Purpose	Once coagulants are added and mixed, heavy particles in the water begin to stick together and form large and heavy flocs.	Flocculants are added to accelerate settling of the flocs. These large particles are removed by scrapers. The water passes through media based filters for further turbidity reduction.	Chlorine Dioxide and/or Chlorine are added to treated water to control microbiological growth. Untreated water with microbial load can cause various problems.	Chemicals are added to control corrosion, scale, deposition and biological fouling in heat transfer equipment. Chemical dosing is automated by dosing skids. Blow down water is passed through filters for re-use in cooling towers.	Improved efficiency is achieved through use of corrosion and scale control chemicals in boilers. Feed water quality of high purity is obtained through DM plants. Condensate polishers enable water re-use.	Process side water generally needs to be of a particular quality. This quality is obtained by treating the water through equipment. RO membranes need to be clean and scale free to maintain throughput.	Microbial cultures help break down complex chemical pollutants and reduce pollution load. Aeration is very important to provide oxygen for break down activity. Coagulants help form large flocs.	Foul odor is an often neglected problem in ETP's. Enzymes are safe to use odor control products. Flocculants accelerate settlement of flocs and their transfer to sludge tank. Filters further reduce turbidity.	Chlorine Dioxide and/or Chlorine are added to treated water to control microbiological growth. Untreated water with microbial load can cause various problems.

What We Do

- Specialty Water Treatment chemicals
 - Raw water treatment coagulants
 - Boiler water treatment formulations
 - Cooling water treatment products
 - Wastewater treatment flocculants
 - Reverse Osmosis (RO) membrane treatment chemicals
- Water treatment equipment
 - Filtration systems for suspended solids removal
 - RO and Resin based solutions for dissolved solids removal
 - Wastewater treatment systems for treating and recycling water
 - Special solutions for process water treatment and recovery
- Bio-remediation of industrial wastewater using microorganisms

Application Areas

Complete Water Treatment solutions

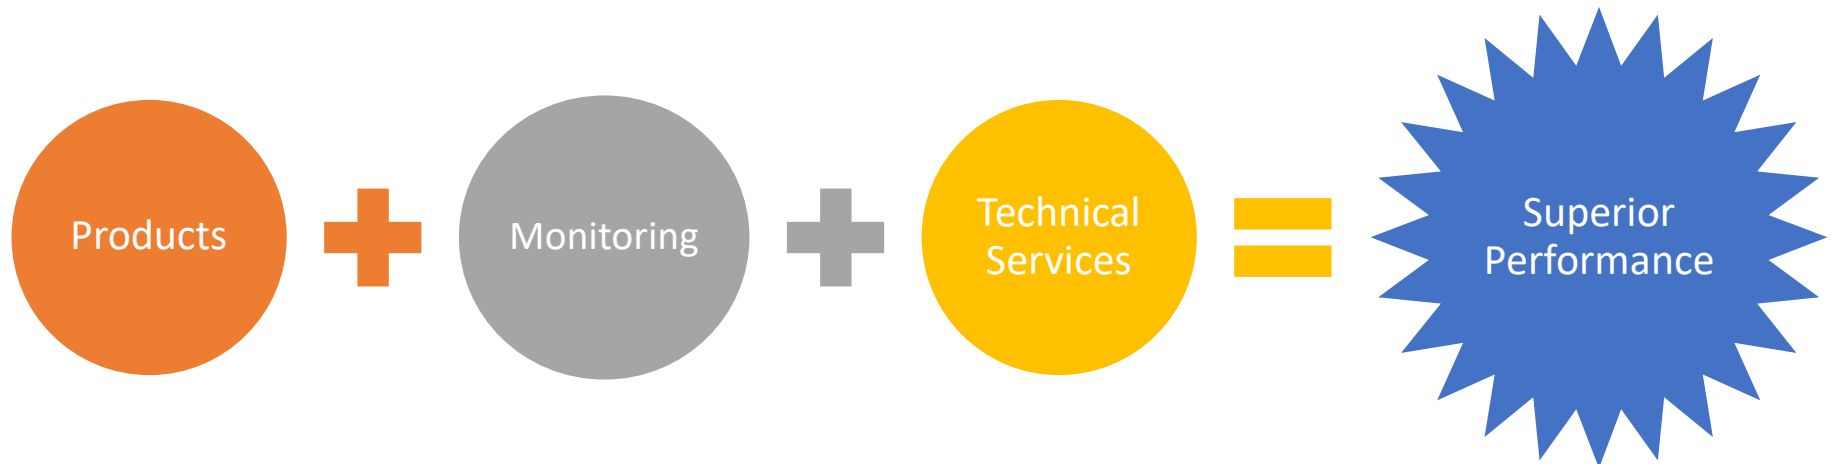

Chembond Clean Water Technologies Ltd

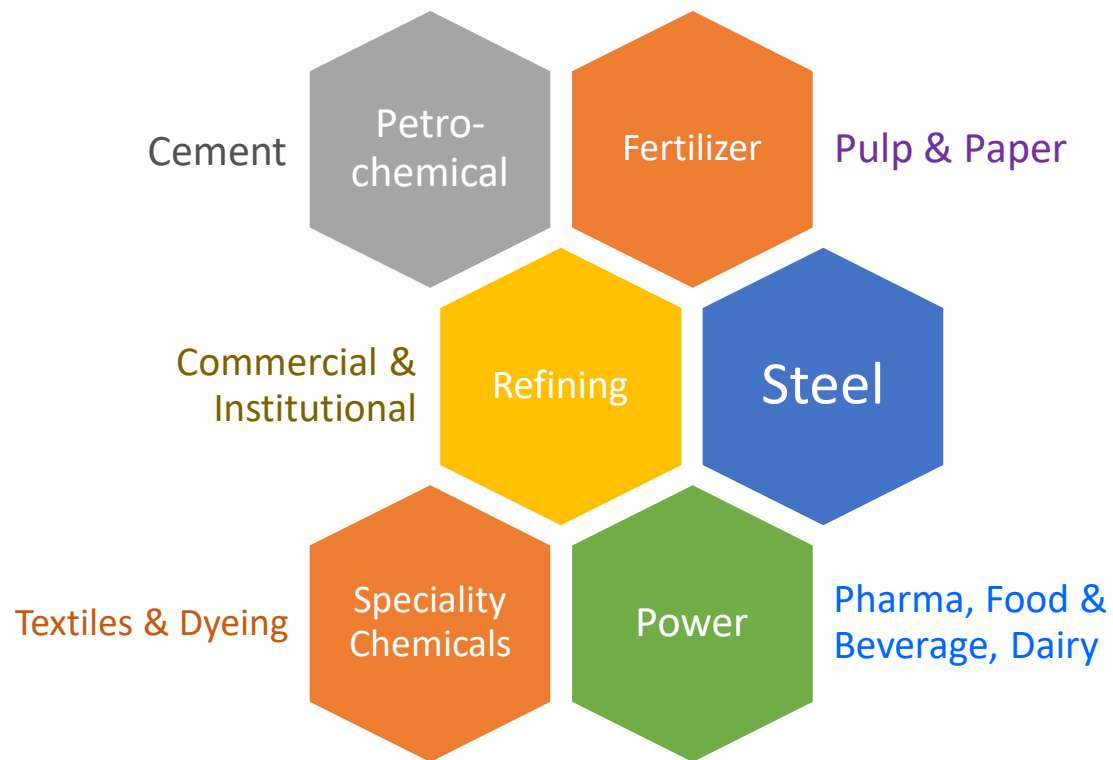

Chembond Water Technologies Ltd

Superior Performance = Customer Satisfaction[®]

Customer Segments

Our Silver Bullets

- Integrated solutions – equipment, bio-remediation and chemicals
- Trained, Empowered and Dedicated services team
- Pioneer in India for leading edge technology introductions:
 - Glassy Zinc Polyphosphate corrosion inhibitor
 - Chlorine Dioxide based oxidizing biocide
 - Multicomponent, concentrated product tablets for mid-sized water systems
 - Performance Based, self learning monitoring and control automation
- Excellent track record since 1982

Animal Health and Nutrition

Chembond Biosciences Limited

2023-24

About

- Chembond entered this segment in 2010
- Produce nutritional supplements for animal health industry
- Catering mainly to the poultry and dairy industry
- Presence across India with manufacturing at Tarapur
- Quality products at excellent value
- Experienced yet young team

Product Range

Products that enhance nutrition, reduce waste, improve mortality rates

Construction Chemicals

Chembond Chemicals Limited

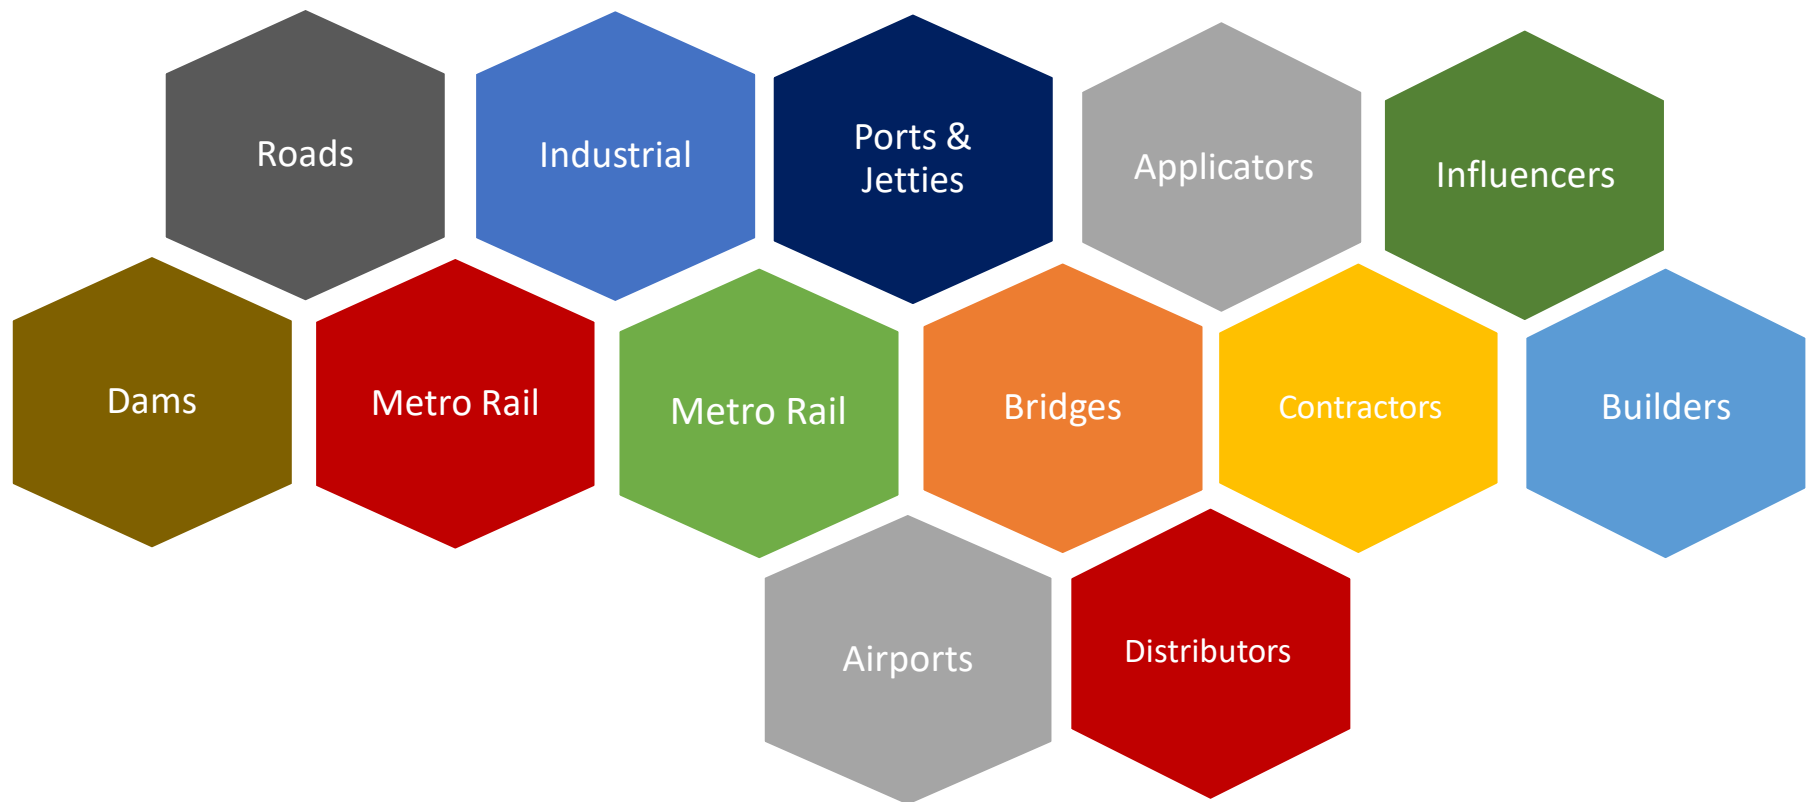

2023-24

Products

- Products for a wide range of applications
 - Admixtures for concrete modification
 - Sealants based on Polysulphide, PU and Acrylics
 - Waterproofing solutions for under-construction and built-up structures
 - Repair mortars for concrete roads, structures and flooring
 - Curing compounds for concrete
 - Grouts for heavy engineering equipment
 - Tile adhesives and joint fillers
